kevinzheng700@gmail.com | New York, NY | github.com/KevinZheng0701 | linkedin.com/in/kevin-zheng-0490b7255

EDUCATION

Macaulay Honors College at City College of New York, City University of New York (CUNY)
Bachelor of Science in Computer Science, Minor in Mathematics | GPA: 3.89/4.00

Manhattan, NY
June 2025

Relevant Coursework

Algorithms, Artificial Intelligence, Data Structures, Database Systems, Distributed Systems, Machine Learning, Object-Oriented Programming, Operating Systems, Programming Paradigms, Scientific Programming, Software Engineering, Web Development

SKILLS

Programming: React, Next.js, Python, JavaScript, TypeScript, TailwindCSS, Node.js, Express, SQL, C#, C++

Technologies: Git/GitHub, MongoDB, Supabase, MySQL

Certifications: CodePath's Advanced Technical Interview Prep(Aug 2024); CodePath's Intermediate Web Development(May 2024)

Spoken Languages: Mandarin (Conversational)

RELEVANT EXPERIENCE

CUNY Tech Prep

Software Development Fellow

New York, NY
Jul 2024 – May 2025

- Selected for a competitive web development fellowship with students from across the 11 CUNY senior colleges where fellows create technical projects using tools such as **React**, **Node.js**, **Express.js**, and **PostgreSQL**.
- Participate in weekly courses and learn industry best practices for design, implementation, and deployment such as MVC, version control with **Git/GitHub**, agile & Scrum with Trello and Slack, test-driven development, and CI/CD.

Jupiter Leo Productions LLC

Web Developer Intern

New York, NY
Jul 2024 – Aug 2024

- Developed 5 interactive mini-games with **JavaScript**, **HTML**, and **CSS** to test users' understanding of the chapter topics, creating an engaging and educational experience.
- Designed and refined responsive game interfaces for seamless accessibility across various devices.
- Co-led a team of 10 web development interns, providing troubleshooting support, ensuring efficient progress on project milestones, and maintaining regular communication with the manager.

PROJECTS

BattleUP, <https://github.com/KevinZheng0701/BattleUP>

Mar 2025 – May 2025

- Designed and developed an online 1v1 push-up competition platform in a team of 3 using **Next.js**, **TypeScript**, and **Flask**, combining real-time video, AI-powered motion tracking, and competitive gameplay.
- Implemented peer-to-peer video communication with **WebRTC** for low-latency push-up battles, using **TURN servers** (via Xirsys) for fallback reliability, and **Flask-SocketIO** for seamless matchmaking and signaling.
- Integrated the **MoveNet** motion tracking model in the frontend to detect joint positions and enhanced push-up detection logic to improve robustness and reduce false positives.

Multiplayer Soccer Simulation, <https://github.com/KevinZheng0701/MultiplayerSoccerSimulation>

Feb 2025 – May 2025

- Built a real-time multiplayer robot soccer simulation as a senior capstone project in a team of 2 using **Webots** and **Python** to explore autonomous robot decision-making and a synchronized game state under the WYSIWIS paradigm.
- Designed and implemented a custom client-server communication protocol using **TCP sockets**, featuring structured message formatting, real-time game state synchronization, and dynamic role coordination (Striker, Midfielder, Goalie).
- Simulated network latency by injecting artificial delays into client-to-server messages, implemented a server-side queue to buffer and process delayed packets, and tested robot resilience under various fault conditions.

Recipe Remix, <https://github.com/KevinZheng0701/RecipeRemix>

Sep 2024 – Dec 2024

- Led the ideation and development of a food recipe search application using **React**, **Express.js**, **Node.js**, and **Supabase**, overseeing the application as the project manager in a group of 4.
- Coordinated task distribution, reviewed pull requests, and maintained code quality and consistency within the team.
- Developed secure account authentication, integrated the **Spoonacular API**, and built robust backend functionality.

Video Game Catalog, <https://github.com/KevinZheng0701/VideoGameCatalog>

Mar 2024 – May 2024

- Spearheaded a video game catalog application using the **MERN** stack, serving as the Test Engineer in a team of 4.
- Implemented search functionality, genre and platform-based filtering, and a wishlist feature to improve user experience.
- Configured **Jest** and **Cypress** for testing, set up **GitHub Actions** for automation, and reviewed pull requests for quality.

ASSOCIATIONS

CodePath

Feb 2023 – Present

Tau Beta Pi Engineering Honor Society

Nov 2022 – Present
